WEPOS Cement Residue Remover for Marble & Natural Stone

Description

Concentrate. Gently and effectively removes cement residue, cement remains, grout residues, lime deposits and soiling from surfaces sensitive to acids. For mild cleaning of sensitive coatings. For wall and floor space indoors and out.

Effect:

Removes cement skin, cement residue, residues of jointing mortar, lime deposits and soiling carefully and highly effectively. Suitable for mild cleaning of sensitive coatings.

Application:

For all surfaces sensitive to acids. Marble, terrazzo, travertine, Jura stone, Solnhofen slabs, calcareous natural and artificial stone coatings, concrete slabs, polished and absorbent granite surfaces in inside and outside areas. For walls and floors.

Direction of use:

Jointing material must be hardened before use. Remove loose cement and lime residues prior to use.

Slightly moisten soiled surface. Depending on the thickness of the cement skin, apply product undiluted or diluted 1:5 with water and distribute with scrubbing brush sponge. Allow to work briefly, but do not let dry. Remove the dissolved residues with scrubbing brush and sponge, suction device or cloth. Thoroughly wash off with plenty of water.

Important:

Prior to use, always check surface compatibility. Prior to use, thoroughly moisten area of application, in particular, around the joints.

Technical Informations

- Density: 1,01 g/ml
- PH: 9,5 – 10,5
- colour: clear liquid
- smell: neutral

Safety instructions:

Keep out of the reach of children.

Packing unit

1000 ml-bottle (4 per box)
